

Medisteel is a leading steel company in Egypt that was established in year 2008 with the goal of becoming one of the leading companies in the steel industry. The company acquired Tanta Steel Plant, which was established in year 1989, and has since then expanded its production capacity to 100,000 tons of steel annually. Medi steel's products conform to Egyptian and international standard specifications and are used in a wide range of applications, including construction and infrastructure. The company has a wide network of customers in the Egyptian market and is committed to providing its customers with the highest quality products and services. Medisteel head office is located in Corniche Maadi, Cairo.

Medisteel produces high-quality reinforcing steel products with different sizes from 8 mm to 25 mm. In addition Medisteel also produces high-resistance B500DWR steel rebars.

Medisteel is committed to using modern technology and investing in the promising future to provide superior levels of service. In line with this commitment, the company is building a new rolling mill plant in Benisuef governorate with an area of 112,000 square meters that includes all integrated industries for reinforcing steel. The factory is expected to start production in year 2024 and will have a production capacity of 350,000 tons annually.

The new plant will be equipped with the latest Italian origin technology in rolling mills. Medisteel will be able to produce a wide range of steel products, including structural angels, slabs and rebars. This will allow Medisteel to meet the growing demand for steel products in Egypt and the Middle East. It will also allow the company to export its steel products to different markets.
